

EXP 12: CHANGE HARDWARE COMPATIBILITY OF A VM (EITHER BY CLONE/CREATE NEW ONE) WHICH IS ALREADY CREATED AND CONFIGURED.

AIM:

To Change Hardware compatibility of a VM (Either by clone/create new one) which is already created and configured.

PROCEDURE:

STEP 1: Goto vm ware workstation.

STEP 2: Right click the vm and goto the settings.

STEP 3: Add hardware wizard and select scsi and click next.

STEP 4: Create new virtual disk.

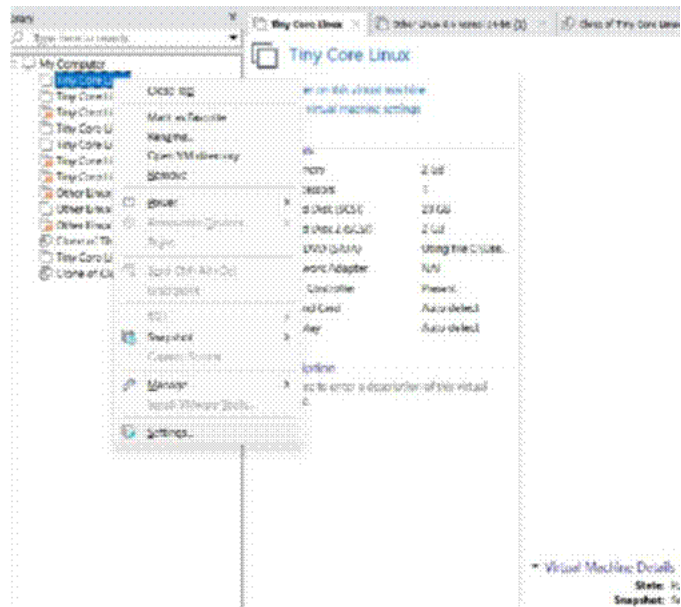

STEP 7: Set the virtual disk size to 2.0 GB.

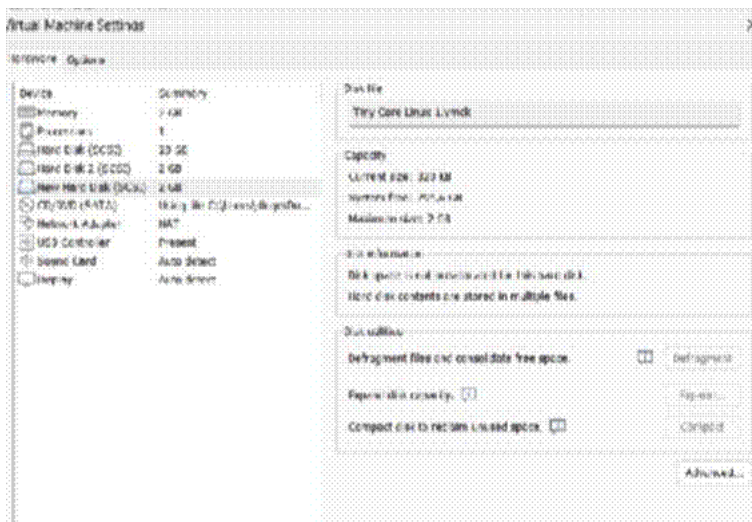

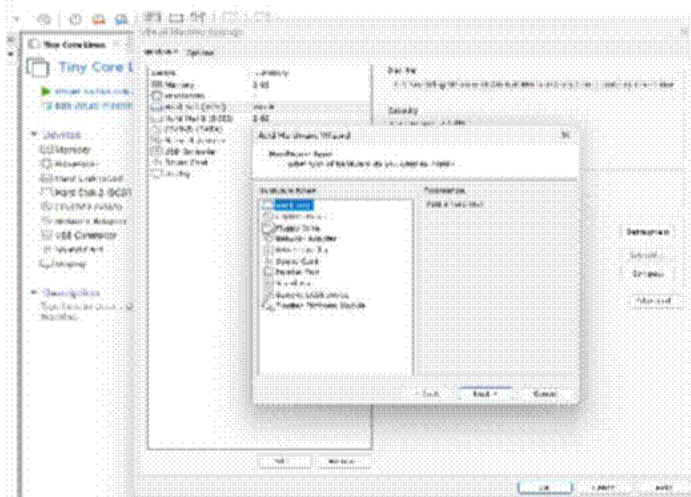

STEP 8: Select Split virtual disk into multiple files and click Next.

STEP 9: Give a suitable name to the virtual disk and click Finish.

STEP 10: Verify that the newly added 2 GB SCSI virtual disk is displayed in the Virtual Machine Settings.

STEP 11: Click OK to save the changes.

RESULT:

Thus, the existing virtual machine was successfully configured with additional virtual hardware, and a 2 GB SCSI virtual disk was added using VMware Workstation.
